February 2021

Dear families,

I hope you and your children have settled into a strong study routine as we enter a bright 2021! Please feel welcome to share with me your child's learning goals for school and Kumon, and we can meet to discuss what we can do to reach these goals together.

To show what Kumon can help children to achieve with Kumon, I am sharing with you the story of Dhruv, an aspiring neurosurgeon who is studying far beyond his school grade level.

Future neurosurgeon advances far beyond school grade

Dhruv, an aspiring neurosurgeon and advanced Kumon student.

Dhruv, six years old and in Year 1 at school, says the highly advanced mathematics and English he is studying now at Kumon will help him achieve his goal of becoming a neurosurgeon.

Dhruv studies the Mathematics and English programmes at a level far ahead of his school grade.

He is comfortably studying algebra in Kumon Mathematics and is interpreting texts in Kumon English.

Dhruv said Kumon has helped him in many ways.

“Kumon helped me by improving my speed, accuracy and knowledge in mathematical concepts way beyond my school years”, Dhruv said

“Kumon English has helped me with my comprehension, vocabulary and spelling.”

“Kumon has also helped me by letting me work at my brain level rather than my age level, and with discipline and focus.”

In addition to becoming a neurosurgeon, Dhruv wants to become a theoretical mathematician, a scientist and inventor.

He is confident that if he continues to persevere and put in the right amount of effort, he will achieve all of his goals.

“Kumon has showed me my strengths and also taught me never to give up. If you put your mind into something and try hard you will definitely [achieve your goal]”, Dhruv said.

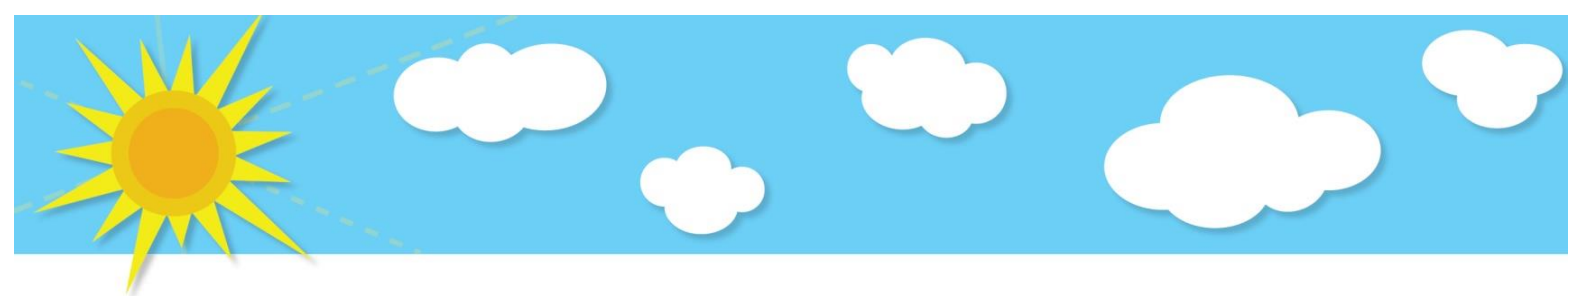

KUMON POINT COOK EDUCATION CENTRE
